Key Word Index

Activation
anhedonia; arousal; contingent negative variation; EEG power spectrum; heart rate; galvanic skin response; reaction time, 107
teaching; stress; electromyography; heart rate; blood pressure; relaxation; personality type, 275
Alcoholism
evoked potential; item recognition; depression; schizophrenia, 215
Anhedonia
activation; arousal, contingent negative variation; EEG power spectrum; heart rate; galvanic skin response; reaction time, 107
Anxiety
caffeine; autonomic nervous system; electrodermal activity; cardiovascular activity; heart rate, 33
electrodermal habituation; non-specific electrodermal activity; autonomic reaction pattern; attention; vigilance, 43
Anxiety and relaxation
relaxation training; relaxation methodology; tension interval; attention focusing in relaxation, 207
Arousal
anhedonia; activation; contingent negative variation; EEG power spectrum; heart rate; galvanic skin response; reaction time, 107
Attention
electrodermal habituation; non-specific electrodermal activity; autonomic reaction pattern; vigilance; anxiety, 43
Attention focusing in relaxation
relaxation training; relaxation methodology; tension interval; anxiety and relaxation, 207
Augmenting/reducing
evoked potential; timeband; slope; definition, 125
Autonomic nervous system
caffeine, electrodermal activity; cardiovascular activity; heart rate; anxiety, 33
Autonomic reaction pattern
electrodermal habituation; non-specific electrodermal activity; attention; vigilance; anxiety, 43

Baroreceptor
cardio-cortical; pulse transit time; spectral analysis; electroencephalogram; electrocardiogram, 289
Baseline
physiological reactivity; habituation; resting level, 53
Biofeedback
hemispheric asymmetry; electroencephalography; rapid eye movement sleep; spectral analysis, 253
Bipolar montage
electroencephalography; coherence; discriminant analysis, 63
Blood pressure
occupational stress; urinary catecholamine; urinary cortisol; salivary cortisol; heart rate, 265
teaching; stress; activation; electromyography; heart rate; relaxation; personality type, 275
Brain electric stimulation
human brain; implanted electrode; infraslow physiological process; neuronal impulse activity; correlate of mental processes; brain protective mechanism; physiological variability, 235
Brain protective mechanism
human brain; implanted electrode; brain electric stimulation; infraslow physiological process; neuronal impulse activity; correlate of mental processes; physiological variability, 235

Caffeine
autonomic nervous system; electrodermal activity; cardiovascular activity; heart rate; anxiety, 33
Cardiac-metabolic dissociation
graded mental arithmetic; heart rate; difficulty level, 301
Cardio-cortical
baroreceptor; pulse transit time; spectral analysis; electroencephalogram; electrocardiogram, 289
Cardiovascular activity
caffeine; autonomic nervous sytem; electrodermal activity; heart rate; anxiety, 33
Cognitive task
type A; type B; physiological response; tracking task; reaction time; heart rate; skin conductance; skin temperature, 81
Coherence
electroencephalography; bipolar montage; discriminant analysis, 63
Confidence
event-related potential; P300; reafference; task performance, 25
Contingent negative variation
anhedonia; activation; arousal; EEG power spectrum; heart rate; galvanic skin response; reaction time, 107
Correlate of mental processes
human brain; implanted electrode; brain electric stimulation; infraslow physiological process; neuronal impulse activity; brain protective mechanism; physiological variability, 235

Definition
evoked potential; augmenting/reducing; timeband; slope, 125

0167-8760/87/$03.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

Dependence on cardiac cycle
oculomotor tracking; time on target, 161
Depression
evoked potential; item recognition; schizophrenia; alcoholism, 215
Detector
line orientation; probability summation; receptive field; temporal summation; human, 181
Difficulty level
graded mental arithmetic; heart rate; cardiac-metabolic dissociation, 301
Discriminant analysis
electroencephalography; bipolar montage; coherence, 63

EEG power spectrum
anhedonia; activation; arousal; contingent negative variation; heart rate; galvanic skin response; reaction time, 107
Electrocardiogram
peripheral pulse; evoked cardiac response; pulse transit time, 73
cardio-cortical; baroreceptor; pulse transit time; spectral analysis; electroencephalogram, 289
Electrodermal activity
caffeine; autonomic nervous system; cardiovascular activity; heart rate; anxiety, 33
Electrodermal habituation
non-specific electrodermal activity; autonomic reaction pattern; attention; vigilance; anxiety, 43
Electrodermal asymmetry
sex differences; skin conductance; habituation, 155
Electroencephalography
bipolar montage; coherence; discriminant analysis, 63
hemispheric asymmetry; rapid eye movement sleep; biofeedback; spectral analysis, 253
Electroencephalogram
cardio-cortical; baroreceptor; pulse transit time; spectral analysis; electrocardiogram, 289
Electromyography
goal-directedness; hedonic tone; impulsivity; incentive; muscle tension, 97
teaching; stress, activation; heart rate; blood pressure; relaxation; personality type, 275
Emotion
hypnotizability; left hemisphere; right hemisphere; 40 Hz electroencephalogram; 40 Hz electromyogram, 167
schizophrenia; hemispheric interaction; psychopathology, 261
Emotional connotation
event-related potential, 193
Event-related potential
P300; task difficulty; reference system, 145
potential-related event; slow potential shift; semantic processing; parietal lobe function, 11
P300; reafference; task performance; confidence, 25
emotional connotation, 193
Evoked cardiac response
electrocardiogram; peripheral pulse; pulse transit time, 73

Evoked potential
augmenting/reducing; timeband; slope; definition, 125
reliability; flash stimulus; statistical method, 135
item recognition; depression; schizophrenia; alcoholism, 215

Flash stimulus
evoked potential; reliability; statistical method, 135
Following acoustical rhythm
tapping; stimulus anticipation, 187

Galvanic skin response
anhedonia; activation; arousal; contingent negative variation; EEG power spectrum; heart rate; reaction time, 107
Goal-directedness
electromyography; hedonic tone; impulsivity; incentive; muscle tension, 97
Graded mental arithmetic
heart rate, cardiac-metabolic dissociation; difficulty level, 301

Habituation
baseline; physiological reactivity; resting level, 53
electrodermal asymmetry; sex differences; skin conductance, 155
orienting response; instructional effect, 227
Heart rate
type A; type B; physiological response; tracking task; cognitive task; reaction time; skin conductance; skin temperature, 81
anhedonia; activation; arousal; contingent negative variation; EEG power spectrum; galvanic skin response; reaction time, 107
video game; mental arithmetic; naturalistic stressor, 151
caffeine; autonomic nervous system; electrodermal activity; cardiovascular activity; anxiety, 33
occupational stress; urinary catecholamine; urinary cortisol; salivary cortisol; blood pressure, 265
teaching; stress; activation; electromyography; blood pressure; relaxation; personality type, 275
graded mental arithmetic; cardiac-metabolic dissociation; difficulty level, 301
Hedonic tone
electromyography; goal-directedness; impulsivity; incentive; muscle tension, 97
Hemispheric asymmetry
electroencephalography; rapid eye movement sleep; biofeedback; spectral analysis, 253
Hemispheric interaction
schizophrenia; emotion; psychopathology, 261
Human
detector; line orientation; probability summation; receptive field; temporal summation, 181
Human brain
implanted electrode; brain electric stimulation; infraslow physiological process; neuronal impulse activity; correlate of mental processes; brain protective mechanism; physiological variability, 235
Hypnotizability
left hemisphere; right hemisphere; 40 Hz electroencephalogram; 40 Hz electromyogram; emotion, 167

40 Hz electroencephalogram
hypnotizability; left hemisphere; right hemisphere; 40 Hz electromyogram; emotion, 167
40 Hz electromyogram
hypnotizability; left hemisphere; right hemisphere; 40 Hz electroencephalogram; emotion, 167

Impedance cardiography
visual search; posture, 19
Implanted electrode
human brain; brain electric stimulation; infraslow physiological process; neuronal impulse activity; correlate of mental processes; brain protective mechanism; physiological variability, 235
Impulsivity
electromyography; goal-directedness; hedonic tone, incentive; muscle tension, 97
Incentive
electromyography; goal-directedness; hedonic tone; impulsivity; muscle tension, 97
Infraslow physiological process
human brain; implanted electrode; brain electric stimulation; neuronal impulse activity; correlate of mental processes; brain protective mechanism; physiological variability, 235
Instructional effect
orienting response; habituation, 227
Item recognition
evoked potential; depression; schizophrenia; alcoholism, 215

Left hemisphere
hypnotizability; right hemisphere; 40 Hz electroencephalogram; 40 Hz electromyogram; emotion, 167
Line orientation
detector; probability summation; receptive field; temporal summation; human, 181

mental arithmetic
heart rate; video game; naturalistic stressor, 151
Muscle tension
electromyography; goal-directedness; hedonic tone; impulsivity; incentive, 97

Naturalistic stressor
heart rate; video game; mental arithmetic, 151
Neuronal impulse activity
human brain, implanted electrode; brain electric stimulation; infraslow physiological process; correlate of mental processes; brain protective mechanism; physiological variability, 235
Non-specific electrodermal activity
electrodermal habituation; autonomic reaction pattern; attention; vigilance; anxiety, 43

Occupational stress
urinary catecholamine; urinary cortisol; salivary cortisol; blood pressure; heart rate, 265
Oculomotor tracking
dependence on cardiac cycle; time on target, 161
Orienting response
habituation; instructional effect, 227

P300
event-related potential; task difficulty; reference system, 145
event-related potential; reafference; task performance; confidence, 25
Parietal lobe function
event-related potential; potential-related event; slow potential shift; semantic processing, 11
Peripheral pulse
electrocardiogram; evoked cardiac response; pulse transit time, 73
Personality type
teaching; stress; activation; electromyography; heart rate; blood pressure; relaxation, 275
Phasic heart rate response
type A behavior; reaction time task, 91
Physiological response
type A; type B; tracking task, cognitive task; reaction time; heart rate; skin conductance; skin temperature, 81
Physiological reactivity
structured interview; self-disclosure; speech behavior; sex; type A, 1
baseline; habituation; resting level, 53
Physiological variability
human brain; implanted electrode; brain electric stimulation; infraslow physiological process; neuronal impulse activity; correlate of mental processes; brain protective mechanism, 235
Posture
visual search, impedance cardiography, 19
Potential-related event
event-related potential; slow potential shift; semantic processing; parietal lobe function, 11
Probability summation
detector; line orientation; receptive field; temporal summation; human, 181
Psychopathology
schizophrenia; emotion, hemispheric interaction, 261
Pulse transit time
electrocardiogram; peripheral pulse; evoked cardiac response, 73
cardio-cortical; baroreceptor; spectral analysis; electroencephalogram; electrocardiogram, 289

Rapid eye movement sleep
hemispheric asymmetry; electroencephalography; biofeedback; spectral analysis, 253
Reaction time
type A; type B; physiological response; tracking task; cognitive task; heart rate; skin conductance; skin temperature, 81
anhedonia; activation; arousal; contingent negative variation; EEG power spectrum; heart rate; galvanic skin response, 107
Reaction time task
type A behavior; phasic heart rate response, 91

Reafference
event-related potential; P300; task performance; confidence, 25
Receptive field
detector; line orientation; probability summation; temporal summation; human, 181
Reference system
event-related potential; P300; task difficulty, 145
Relaxation training
relaxation methodology; tension interval; attention focusing in relaxation; anxiety and relaxation, 207
Relaxation methodology
relaxation training; tension interval; attention focusing in relaxation; anxiety and relaxation, 207
Relaxation
teaching; stress; activation; electromyography; heart rate; blood pressure; personality type, 275
Reliability
evoked potential; flash stimulus; statistical method, 135
Resting level
baseline; physiological reactivity; habituation, 53
Right hemisphere
hypnotizability; left hemisphere; 40 Hz electroencephalogram; 40 Hz electromyogram; emotion, 167

Salivary cortisol
occupational stress; urinary catecholamine; urinary cortisol; blood pressure; heart rate, 265
Schizophrenia
evoked potential; item recognition; depression; alcoholism, 215
emotion; hemispheric interaction; psychopathology, 261
Self-disclosure
structured interview; physiological reactivity; speech behavior; sex; type A, 1
Semantic processing
event-related potential; potential-related event; slow potential shift; parietal lobe function, 11
Sex
structured interview; self-disclosure; physiological reactivity; speech behavior; type A, 1
Sex differences
electrodermal asymmetry; skin conductance; habituation, 155
Skin conductance
type A; type B; physiological response; tracking task; cognitive task; reaction time; heart rate; skin temperature, 81
electrodermal asymmetry; sex differences; habituation, 155
Skin temperature
type A; type B; physiological response; tracking task; cognitive task; reaction time; heart rate; skin conductance, 81
Slope
evoked potential; augmenting/reducing; timeband; definition, 125
Slow potential shift
event-related potential; potential-related event; semantic processing; parietal lobe function, 11
Spectral analysis
hemispheric asymmetry; electroencephalography; rapid eye movement sleep; biofeedback, 253
cardio-cortical; baroreceptor; pulse transit time; electroencephalogram; electrocardiogram, 289
Speech behavior
structured interview; self-disclosure; physiological reactivity; sex; type A, 1
Statistical method
evoked potential; reliability; flash stimulus, 135
Stimulus anticipation
following acoustical rhythm; tapping, 187
Stress
teaching; activation; electromyography; heart rate; blood pressure; relaxation; personality type, 275
Structured interview
self-disclosure; physiological reactivity; speech behavior; sex; type A, 1

Tapping
following acoustical rhythm; stimulus anticipation, 187
Task difficulty
event-related potential; P300; reference system, 145
Task performance
event-related potential; P300; reafference; confidence, 25
Teaching
stress; activation; electromyography; heart rate; blood pressure; relaxation; personality type, 275
Temporal summation
detector; line orientation; probability summation; receptive field; human, 181
Tension interval
relaxation training; relaxation methodology; attention focusing in relaxation; anxiety and relaxation, 207
Time on target
oculomotor tracking; dependence on cardiac cycle, 161
Timeband
evoked potential; augmenting/reducing; slope; definition, 125
Tracking task
type A; type B; physiological response; cognitive task; reaction time; heart rate; skin conductance; skin temperature, 81
Type A
type B; physiological response; tracking task; cognitive task; reaction time; heart rate; skin conductance; skin temperature, 81
structured interview; self-disclosure; physiological reactivity; speech behavior; sex, 1
Type A behavior
phasic heart rate response; reaction time task, 91
Type B
type A; physiological response; tracking task; cognitive task; reaction time; heart rate; skin conductance; skin temperature, 81

Urinary catecholamine
occupational stress; urinary cortisol; salivary cortisol; blood pressure; heart rate, 265

Urinary cortisol
occupational stress; urinary catecholamine; salivary cortisol; blood pressure; heart rate, 265

Video game
heart rate; mental arithmetic; naturalistic stressor, 151

Vigilance
electrodermal habituation; non-specific electrodermal activity; autonomic reaction pattern; attention; anxiety, 43

Visual search
Impedance cardiography; posture, 19
